History: This message has been forwarded.

Dear Mr. Torres,

As the overseeing authority for our area I would ask that you and your office fully investigate the area where TexCom has proposed to operate an injection well.. The site is in the middle of an old oil well drill site containing roughly 500 abandoned wells.

Common sense would dictate that the area is too risky to operate an injection well that will contain anti-freeze, paint thinner, etc. If you can honestly say that you would move your family here to live and drink the water from your private well, then please let me know. A friend of mine is about 500 yards from the site and is selling her home. Can I count on you or your office to make and offer? Probably not. And that's what other home buyers are thinking too. So Mr. Torres your help is greatly needed not only to keep our private water wells from being possibly contaminated but also for the property values of our homes.

Your assistance would be greatly appreciated.

Sincerely,

(b) (6)
